(Neuron 77, 1017–1038; March 20, 2013)

In the original version of this Primer, we neglected to acknowledge that the genetic labeling in Figure 2A was modified from Figure 2C of the following paper:

Grienberger, C., and Konnerth, A. (2012). Imaging calcium in neurons. *Neuron* 73, 862–885.

The citation has been added to the legend of Figure 2A in the Primer online. In addition, the format of the heading “Viral Vectors” has been changed to indicate that it is a subheading, and the spelling of “carbocynanine” has been corrected to “carbocyanine.”
